TO: Greg Pulliam, Undergraduate Studies Committee  
CC: Bob Carlson, Dean, School of Applied Technology  
FROM: Mazin Safar, INTM Program Director  
RE: **CHANGES TO BINTM SPECIALIZATIONS**

Pursuant to input from faculty, industry associates, and active students working in industry, INTM's curriculum committee has recommended the following changes to specializations offered within the Bachelor of Industrial Technology and Management (BINTM) program. These changes serve to 1) better identify the content and focus of INTM specializations, and 2) enhance the program's ability to market the program and attract new students to IIT.

Specialization changes to take effect spring 2019 are as follows:

- **Realign existing electives in the INDUSTRIAL FACILITIES (IF) specialization into two specializations, titled as follows:**

**FACILITIES MANAGEMENT (FM)** *(a new specialization)*

INTM 314 Maintenance Technology and Management  
INTM 411 Functional Facilities Management  
INTM 416 Integrated Facilities Management  
INTM 423 Sustainable Facilities Management

**CONSTRUCTION TECHNOLOGY (CT)** *(replaces/new title for IF specialization)*

INTM 407 Construction Technology  
INTM 413 Contract Administration for Construction Projects  
INTM 415 Advanced Project Management  
INTM 417 Construction Estimating

- **Eliminate the TELECOMMUNICATION TECHNOLOGY (TT) specialization**  
*Due to extremely low interest in this specialization*

If additional information is required, please notify me (safar@iit.edu) or Pamela Houser (houser@iit.edu). Thank you.
