Program Narrative and Justification

Narrative description of how the institution determined the need for the program. For example, describe what need this program will address and how the institution became aware of that need. If the program is replacing a current program(s), identify the current program(s) that is being replaced by the new program(s) and provide details describing the benefits of the new program(s). If the program will be offered in connection with, or in response to, an initiative by a governmental entity, provide details of that initiative.

The Bachelor of Science in Business and Engineering degree is an innovative cross-disciplinary program that prepares graduates for careers at the intersection of business and technology. It provides them with critical thinking skills and knowledge that prepare them to adapt to changing technological environments, successfully lead teams, and make key strategic management decisions.

The Business and Engineering curriculum includes a solid foundation in both business fundamentals and core engineering principles. It combines coursework in engineering, management, science, and mathematics with training in functional business areas such as economics, finance, marketing, optimization, entrepreneurship, project management, operations, and leadership.

The program emphasizes STEM by combining relevant coursework in business and engineering, enabling graduates to work successfully in technologically-oriented positions across organizations. Graduates of this program will be well prepared lead frontier technological efforts in their organizations.

Narrative description of how the program was designed to meet local market needs, or for an online program, regional or national market needs. For example, indicate if Bureau of Labor Statistics data or State labor data systems information was used, and/or if State, regional, or local workforce agencies were consulted. Include how the course content, program length, academic level, admission requirements, and prerequisites were decided; including information received from potential employers about course content; and information regarding the target students and employers.

The Bachelor of Science in Business and Engineering was developed by the Stuart School of Business in consultation with the faculty and leadership of the Armour College of Engineering, especially Armour's Department of Civil, Architectural, and Environmental Engineering (CAEE), as well as industry experts and practitioners.

Narrative description of any wage analysis the institution may have performed, including any consideration of Bureau of Labor Statistics wage data related to the new program.

A Bachelor of Science in Business and Engineering degree can provide an excellent preparation for the private sector job markets, particular in the technology sector. Students with degree have a relatively high mean salary of between \$88,000 and \$95,000, according to the Bureau of Labor Statistics. The job outlook is good, with job growth projected to increase at a range of 7% to 9% annually. Graduates are well prepared to work successfully in technologically-oriented positions across organizations and to lead frontier technological efforts in their organizations. See <https://www.bls.gov/ooh/business-and-financial/financial-analysts.htm> and <https://www.bls.gov/ooh/architecture-and-engineering/civil-engineers.htm>

Narrative description of how the program was reviewed or approved by, or developed in conjunction with, one or more of the following: a) business advisory committees; b) program integrity boards; c) public or private oversight or regulatory agencies (not including the state licensing/authorization agency and accrediting agency); and d) businesses that would likely employ graduates of the program. For example, describe the steps taken to develop the program, identify when and with whom discussions were held, provide relevant details of any proposals or correspondence generated, and/or describe any process used to evaluate the program.

"The Bachelor of Science in Business and Engineering was developed by the Stuart School of Business in consultation with the faculty and leadership of the Armour College of Engineering, especially Armour's Department of Civil, Architectural, and Environmental Engineering (CAEE), as well as industry experts and practitioners.

Academic Information

Advising

Since quality advising is a key component of good retention, graduation, and career placement, how will students be mentored? What student professional organizations will be formed? How will the department work with the Career Services office to develop industry connections?

Students will be advised by the Stuart Undergraduate Program Director.

Program Resources

Which program
resources are
necessary to offer
this program?

Personnel
Facilities

Describe the personnel requirements necessary to offer the program. Describe how and when resources will be made available to hire any additional personnel that are required.

No new personnel are required.

Describe the facilities requirements necessary to offer the program. Describe how and when resources will be made available to obtain any additional facilities that are required.

No new facilities are required.

Program Outcomes and Assessment Process

What are the learning goals for this program?

Learning goal	Courses/student work used to assess achievement of this goal
<p>SSB Common Goal 1 a: Oral Communications Skills Students will prepare and deliver oral presentations that are well-structured, technically competent and make good use of aids to support evidence-driven conclusions.</p> <p>SSB Common Goal 1 b: Written Communications Skills Students will prepare documents in text-based media that are clear, accurate, and appropriate for the intended audience</p>	BUS 305
<p>SSB Common Goal 2: Critical Thinking Skills Students will analyze and critique presented arguments as well as develop well-reasoned arguments that are supported by arguments..</p>	BUS 480
<p>BSBA Analytical Skills - Graduates will possess the analytical skills to support business decision making.</p>	BUS 455
<p>BE Application of Business Principles</p>	BUS 321, BUS 351

In what semesters will the data be collected to assess this learning goal, and by whom?

Each semester in which program courses are offered.

Provide the name of the rubric that will be used to assess the extent to which students are achieving this learning goal.

See above.

How often and by whom will the data be analyzed? What benchmarks or targets will be used to interpret your results?

Each semester. The data will be analyzed by assigned faculty evaluators. Benchmarks are set by faculty.

Briefly describe the process that will be used to share the results with faculty and use these to motivate program improvement.

The Program Director meets with faculty on a regular basis to evaluate results of evaluations and to develop improvement programs. Students have access to IIT Career Center as well as Stuart Career Management Center services.
