Hi Fred,

The S designator subcommittee has reviewed the syllabus for SSCI 492. The syllabus originally submitted was determined to be insufficient for making a decision. The instructor revised the syllabus to address the issues raised by the committee and also attached an appendix to the syllabus highlighting how S-learning objectives will be assessed in this course. The revised syllabus along with the appendix file are attached. Based on the revised syllabus we find that they all meet the 4 criteria established in current UGSC policy.

Best wishes,

Priyanka
